About This Game

Brain Crush is a mind, “strategy”, and fast thinking game in a world of 2D.

Basically, the biggest goal of the game is to reach a blue portal looking a lot like the main character. The game might improve your real life reflexes and logic thinking as well.

Brain Crush contains 2 campaigns with 10 unique levels each + 1 bonus level each, 3 hidden Nightmare levels, 3 minigame levels, and 3 Halloween themed levels!

EXTRAS

The game is filled with lots of Easter eggs, a hidden storyline, and an unknown amount of secret rooms!

UPDATES

Brain Crush is built up in a way that new campaigns and secrets always can be added to the game. That means that the game will keep evolving based on community interest!

The 2 campaigns offer a gameplay of 30 to 60 minutes each for a player playing the game for the first time (and without any tutorials watched).

Some players might complete the Nightmare levels in 30 minutes, others in 4 hours or more...

In Brain Crush Classic you will encounter 5 tool blocks which will or will not help you reach your goal:

Balls - Fire - Laser - ? - Spikes

In Tech Crush you will be playing as 2 characters: 1 & 2, but only one character can be played at a time.

Pressing ESC or BACKSPACE will let you quit the game, so will the red X in your window. The only difference is that the red X won't let you say no to quitting the game!

WARNING!

Brain Crush can cause a lot of frustration.

It is advised to take breaks from the game once in a while.

If you keep getting stuck on a level, it is also highly recommended that you play the training campaigns!

Title: Brain Crush
Genre: Indie
Developer:
Chano H. Hansen
Publisher:
Chano H. Hansen
Release Date: 18 Aug, 2017

b4d347fde0

Minimum:

Storage: 9 MB available space
